SKILLS AND INTERESTS

Frontend & Mobile	React.js, Next.js, JavaScript (ES6+), TypeScript, Redux Toolkit, React Query, Context API, HTML5, CSS3, Tailwind CSS, App Store Publishing
Backend	Node.js, Express.js, Sails.js, REST APIs
Database & Caching	PostgreSQL, Firebase Firestore, Supabase, Redis
Architecture & Protocols	WebSockets, Socket.io, Webhooks, Role-Based Access Control (RBAC)
Cloud & DevOps	Google Cloud Platform (GCP), VMs, Serverless, Docker, Bash Scripting, CI/CD
Tools & Integrations	Stripe, Firebase Auth, Twilio, Git, GitHub, Postman, VS Code, Jira

PROFESSIONAL EXPERIENCE

Zignuts Technolab <i>Software Engineer</i>	Jul 2023 – Present <i>Gandhinagar, Gujarat</i>
- Architected and maintained scalable full-stack web applications utilizing Next.js, TypeScript, Node.js, and Redux Toolkit, improving runtime reliability across deployment lifecycles. - Configured and managed Google Cloud Platform (GCP) infrastructure, deploying serverless backends and standalone virtual machines (VMs) to handle core application architecture. - Engineered automated custom Bash deployment scripts, reducing code-to-production deployment times and streamlining continuous integration workflows. - Engineered secure backend integrations for third-party systems (Stripe, Twilio), minimizing transaction sync latencies and reducing processing exceptions by 15% via robust webhook flows. - Developed enterprise-grade full-stack features for multi-tenant SaaS platforms, interactive client portals, and metrics dashboards, boosting development velocity by 20%.	
Zignuts Technolab <i>Software Engineer Intern</i>	Jan 2023 – Jun 2023 <i>Gandhinagar, Gujarat</i>
- Built full-stack candidate assessment and internal recruitment application workflows powered by React.js and Redux Toolkit, accelerating candidate sorting times. - Developed security-focused administrative panel configurations alongside data visualization portals for core end-user analytics tracking. - Participated actively across development operations workflows, reducing software production bug counts through thorough schema debugging and modular component testing.	

KEY PROJECTS

AI-Powered Enterprise Productivity & Collaboration Suite

Tech stack: Sails.js, PostgreSQL, Redis, WebSockets, Generative AI APIs

- Developed a scalable multi-org collaboration platform featuring custom role definitions, team management structures, and an automated task-tracking module.
- Integrated multi-modal Generative AI APIs (text, image, video, audio, and music) with a Redis queue-based processing system to handle heavy asynchronous generation tasks.
- Built a real-time time-tracking and synchronization engine using WebSockets to provide instant team performance metrics and live workflow updates.

On-Demand Automotive Service Marketplace

Tech stack: Strapi (Node.js), PostgreSQL, Stripe, REST APIs

- Designed and engineered a multi-tenant car service ecosystem featuring dedicated Admin, Workshop, and User control panels to streamline appointment lifecycles.
- Implemented a secure Stripe payment gateway integration with robust webhook architectures to manage real-time payment state synchronization and transaction logging.
- Architected a role-based access control (RBAC) database schema in PostgreSQL to manage granular permissions, booking workflows, and manual admin overrides.

Multi-Category Travel & Adventure Rental Engine

Tech stack: Next.js, Tailwind CSS, JavaScript, Generative AI Frameworks, App Store Connect

- Developed a high-performance travel booking and rental marketplace allowing users to dynamically search, filter, and reserve vehicles, boats, and campsites by location and date.
- Engineered a dynamic pricing calculator that processes intricate per-day rates, date ranges, and host-specific booking options (Instant Booking vs. Host Approval).
- Leveraged existing web functionality alongside advanced AI orchestration models to build, compile, and successfully publish the platform’s companion mobile application to the official Apple App Store.

EARLIER EXPERIENCE & TRAININGS

Full Stack Intern | TatvaSoft Software Company June 2022

- Designed and built an end-to-end e-commerce BookStore website utilizing full-stack development patterns.

Full Stack Intern | Infikey Technologies Pvt Ltd June 2021

- Engineered a data-driven Doctor Portal web application tailored to optimize scheduling and appointment logistics.

EDUCATION

Bachelor of Engineering in Information Technology July 2019 – April 2023
Charotar University of Science and Technology (CHARUSAT), Changa
CGPA: 8.86
